made in germany

Floors from Germany. Quality from Germany. And ideas from all over the world. All the values associated with the 'Made in Germany' label. Dependable. Durable. Close to our customers. For us 'being close to you' is not simply a geographical concept but an integral part of our philosophy. Close to you in our way of thinking, in discernment and in understanding your needs. Which means we are always there for you.

35-hectare factory complex
in Lampertswalde (Germany) –
equivalent to 50 football pitches

Facts & figures

- More than 11,000 employees at over 30 production sites worldwide – an international outlook with a strong local presence
- Over 60% of what we make is destined for export – our products are popular in more than 90 countries around the world

Over 100 years in the business. More than 30 factories around the world. Satisfied customers in more than 90 countries. But still both feet firmly on the ground.

What began in an Austrian sawmill back in 1897 has since become a global success story. As the world's leading manufacturer of laminate flooring, we have established our reputation in over 90 countries around the world. This is due in no small part to our pursuit of perfection. Because we always want to be better than our competitors. We know exactly what our customers want.

That's why we leave nothing to chance. We make everything ourselves.

Which includes manufacturing the coreboards, making the adhesive and producing the impregnates – vertical integration that gives us total control over the entire manufacturing process. And over every single detail.

You can see the result in our floors. You can even feel it. Because thanks to our innovation, we have succeeded in getting closer and closer to nature. With all the advantages that a laminate floor offers, such as easy maintenance, all-purpose application and

the ingenious click system for easy installation. It couldn't be simpler. And yet none of this would have been possible without our years of experience and extensive research. Because we know what our customers want.

company profile

Over 170 designs. From classic to modern. So there will always be a floor that is to your taste.

Choose from an incredible variety of designs that are the perfect match for any interior. We currently have more than 170 in our product range. One is bound to be right for you.

We are constantly coming up with new ideas that keep us one step ahead of the latest fashion. To do this, we have a team of dedicated designers who not only track current trends but also anticipate them. They know exactly what will get customers excited. With the whole world of design and comfort to their feet.

Superior design for us means sleek appearance coupled with a sensual feel. Our latest innovation is the extra-long Grand Vintage Next Gen:

precise digital design in crisp resolution. The great variety of patterns in the printing process gives your floor a uniquely authentic appearance, almost without repetition.

But there is more to design than just appearance. Substance also counts. That's why we are constantly developing our products to create even more comfortable surroundings and provide greater comfort under foot. An antibacterial coating that inhibits bacteria growth. A robust surface that resists wear and tear. Better protection against micro-scratches which can be caused by mechanical stress. For lasting enjoyment of your floors. And for a good homely feeling.

The look and the feel of real wood

...plus all the practical surface properties that you expect from a laminate floor. Easy to maintain. Easy to install. Protection against micro-scratches. And an anti-bacterial coating. Modern methods make all of this possible while modern technology enhances the visuals. Krono Original® – the floors of the future.

design and surface textures

The elegant longboards in Harbour Oak (8468) design absorb the history of the property and revitalise it with a modern, homely atmosphere.

Where once there were dark beams, low light and bare floorboards, there is now a welcoming, light-infused studio to relax in.

A before-and-after story with the WOW! effect.

What started off as a dark and dingy old attic has been changed beyond recognition. Because thanks to the use of modern extra-long Krono Original® floor panels, the space has undergone a miraculous transformation.

Five simple steps to a new living environment. Here's how:

1. Underlay with 22dB (XPS5.0) sound insulation ensures that the sheer delight of the occupants with their new living space does not impinge on the peace and quiet of the people in the room below. It also compensates for irregularities in the subfloor of up to 4mm. (NB: As the subfloor is made of wood, a

vapour barrier should not be used.)

2. In rooms that exceed eight metres in length, an expansion joint must be created in the middle. Consistent with the dark colouring, this should be in the form of a 34mm stainless steel threshold strip from the professional parts list (91221). Because of its two-part design consisting of an upper and a lower bar, installation is straightforward and it allows the material to expand and contract naturally.

3. The expansion joint around the fireplace was concealed behind an elegant skirting board which echoes the tone and decor of the floor. Using matching clips (50510), the attachment of the skirting is cleverly

concealed.

4. Where the boards have been trimmed at an angle or around door frames, the joints can be filled with add2 acrylic sealer.

5. Now all that remains is to sweep the new floor clean with a fine broom. This is also the right time to apply the first coat of the add2 (90411) floor care product, which is ideal for keeping the floor in top condition. This tried-and-tested cleaning agent has been specially formulated to bring the best out of high-quality Krono Original® floors. It prevents the accumulation of dirt, protects the edges and ensures that the room continues to smell wonderful.

before-and-after story

"I won't compromise my principles. When I buy something, I want to be sure it comes from sustainable sources. So I checked out Krono Original® floorings and found out they use timber from responsibly managed forests. I trust them because, being one of the world's leading manufacturers of laminate flooring, they have a sustainability policy which commits them to reducing their impact on the environment. Which means I can update my home with renewable materials."

Resource-efficient production.

Only wood from sustainably managed forests.

Healthy living – certified. All of this amounts to an expression of a love that goes beyond numerical values: our love of nature.

Wood is our world. And wood is natural. Consequently, we are at one with nature. In our production and in our philosophy. Because we want to give back to nature what it gives us in quality of life. That's why we are careful to only use wood from sustainably managed forests. PEFC certified.

With completely traceable origin. In our manufacturing processes too, the environment is always foremost in our mind. Our objective is to keep waste from production as low as possible – and indeed throughout the entire product life cycle.

* Statement on level of emission of volatile substances in indoor air posing a toxic threat during inhaling - on a scale from A+ (very low emission) to C (high emission).

We achieve a high recycling rate within the manufacturing process or alternatively use waste material to generate carbon-neutral energy for our production facilities. Our water and energy consumption is constantly monitored. This enables us to quickly identify potential savings and of course implement them in an environmentally friendly way.

This affinity for nature carries over into our products. Our floors are not only environmentally friendly, but also contribute to a healthy living environment. We are committed to using low emission bonding agents that contribute to the overall healthy balance of our products. With certified E1 quality. Quite naturally!

environment

You will appreciate the features of our flooring. Easy installation, A.B.C. Anti Bacterial Coating, Endless Beauty look or Handscraped effect are just some of the strengths of Krono Original®.

Guarantee All Krono Original® laminate floors are put through a series of rigorous tests in order to comply with international quality standards, which is why we grant an extensive guarantee with every product. You can be rest assured that, whatever range you choose, it's going to be easy to maintain and will give you enjoyment for many years to come.

Stain and imprint resistant Whatever you might spill, be it red wine, oil or jam, don't panic; it can be easily removed. Krono Original® is also abrasion resilient, robust and proven to be one of the most resistant floorings available, even heavy furniture won't leave an imprint. Please use felt pads for your furniture and ensure that swivel chairs are fitted with soft castors.

Twin Clic The Krono Original® Twin Clic system has been specifically designed to make fitting your laminate flooring as easy and hassle free as possible. The Clic and groove profiles allow individual panels to be joined together quickly with minimal tools or complications.

1clic2go Even in hard to reach places like corners, doors and under radiators, the ingenious "1clic2go" system makes installing Krono Original® floors simpler and faster than ever. The tongue & groove joint along the length of the panel is placed in position from above and fixed flush with the adjoining panel. The panels are then securely interlocked as the patented "1clic2go" beading latches into position with an audible click. Quick. Easy. Secure.

Multi Patent Indemnity Enjoy 100% security with multiple patent protection for all our products! In addition to the Kronoflooring patents, this Multi Patent Indemnity certificate provides extensive protective rights for VÄLINGE INNOVATION AB international and a choice of UNIUN patents worldwide. This involves assured, unrestricted product use of the glue-free click system for the trade.

TÜV Regular independent quality checking via external testing and auditing of the production process as part of the quality assurance system of Kronoflooring.

Anti-slip classes Safety is something we put great emphasis on. Classification in anti-slip classes (R9 and R10) has been achieved through specially developed surface structures, which address the requirements for floor coverings in the workplace and commercial areas where a high risk of slipping is present.

A.B.C. Anti Bacterial Coating We know that keeping your floor as clean as possible will be

important to you and that means minimising the risk from germs. We can't see germs, but we all know the problems they can cause if left unchecked. Allergies can be aggravated and illness can result, which is why Krono Original® has introduced A.B.C., Anti Bacterial Coating that does not allow for germs to grow on your flooring. Germs can be present on a floor from many sources such as shoes, spills or animals etc, but Krono Original® A.B.C. Anti Bacterial Coating, works alongside a hygienic cleaning regime, to create peace of mind and a healthy environment.

Endless Beauty Continuity of decor and structure from panel to panel. In addition to almost invisible joints at the panel's short side, this feature creates the look of never ending planks and leads to a visual enlargement of your room.

Diamond Gloss The high quality of the Authentic Embossed texture is enhanced further by the addition of contrasting multi gloss levels from deepest matt to glossy elements, which reflect the light differently as you move around the floor. It emphasises the depth of the structure and illustrates the character of natural wood perfectly.

Handscraped A breathtakingly elegant and realistic oiled wood finish, with gentle irregular undulations, inspired by traditional Amish craftsmanship. The soft matt surface replicates the hardwood area of solid flooring gently polished over time due to footfall. Meanwhile the deep matt pores are highlighted with glossy accents.

Microscratch Protect This especially durable surface will protect your floors even better against micro-scratches which can occur through heavy use. With Microscratch Protect, your flooring will have the best possible protection against everyday wear and tear.

Eco Friendly All Krono Original® floors are environmentally friendly as standard made of 95% wood sourced from sustainably managed forests. What's more, the entire production chain – from raw materials to the finished product – has been certified and is regularly inspected by independent experts, ensuring peace of mind for you – and protection of our environment.

Digital Design Experience precision design in premium HD quality! The latest printing technology delivers razor-sharp resolution and surface finishes with radiant brilliance. A great variety of printed patterns creates at least 25 different panels per design, to give your floor a uniquely authentic finish. Almost without repetition. So natural in appearance. So cutting edge!

„When selecting a material, I’m obviously interested in the beauty factor. But also in robustness. Only when aesthetics and long life are combined can high functionality be guaranteed.

Thanks to Microscratch Protect, I can rely on my floors to withstand the major and minor impacts to which they are subjected on a daily basis. That’s because this robust surface is more resistant than conventional floors – beautiful and practical at the same time.“

Narrow planks with the broad appeal of handscrape.

The Krono Original® Vintage Narrow plank gives each room a special charm: one of the characteristics of this floor is the handscrape effect surface, which gives the impression that the floor has been handcrafted in the traditional Amish method. The matt brushed surface with lustrous synchronised wood pores reproduces the naturally beautiful structure of real wood. The timeworn look of the gently undulating surface sets the perfect stage for a relaxed vintage look: old treasures, design classics and retro accessories, require a classy, expressive yet conservative floor, to create the right environment to show their true character.

5192 Carbon Walnut

Prestigious design.

Natural. High-quality. Authentic look and feel. Our Super Natural Prestige floors – as the name suggests – exude the elegance and prestige of the very finest materials. Shiny synchronous pores create glossy highlights on the matt brushed surface, whilst the panels' unique size and modern walnut tones will turn modern living into a stylish experience.

Spectacular look and finish.

With these neat narrow panels, you will capture the beauty of real oak and create a stunning, luxurious interior design concept to suit your home. The Authentic Embossed deep-brushed matt and gloss pores in the surface structure, combined with the bevelled edges on all sides, create a highly attractive parquet style floor. The easy to handle panel size not only looks superb, but also makes fitting quick and easy giving you a perfect result.

no problem

For connoisseurs of taste

„A good wine has to mature for many years to develop its full flavour. For intense moments of enjoyment. The reverse principle applies in the case of Krono Original® floors: once you have made the choice, satisfaction is assured for many years to come. In terms of pleasure, intensity and good taste, however, these floors stand comparison with a fine wine. And if the odd drop gets spilt, that's no problem at all for this easy-care floor. One wipe and the splash is gone. Simply pleasant!“

anti bacterial coating – A. B. C.

Hygienic and safe

„Standards of hygiene are important at work, in the kitchen and of course in the home. Especially if you have small children. That’s why I chose Krono Original® with A.B.C. Anti Bacterial Coating. Germs may be invisible to the naked eye, but we all know the harm they can do if they are not kept at bay: they can intensify allergies and cause illness. A.B.C. does not allow bacteria the opportunity to multiply and gives me the assurance of utmost cleanliness for myself, my family and my customers.“

5552 White Oiled Oak

Rustic plank effect for a finer lifestyle.

The exquisite Castello Classic floor perfectly emulates nature. With its realistic rustic texture and subtle surface structures you can actually feel, it's almost impossible to tell the difference from actual wood. But, unlike the real thing, Castello Classic is easy to care for and keep clean, giving you enduring beauty for many years to come.

feels as good as it looks

„Dancing is an expression of the soul. Original, genuine and from within. The same distinguishing features that are found in Authentic Embossed floors from Krono Original®. Because the synchronous pores allow you to trace with your fingers the structure of the wood grain. Beauty that you can see. And feel. An elegant real-wood look combined with all the comfort and convenience of a high-quality laminate. Grace that moves.”

Beauty tip: Clean your new laminate floor immediately after it has been laid to remove any dust created during the job. First, sweep with a broom or use a vacuum cleaner. Next, apply our laminate cleaner. This has been specially formulated to prevent water getting into open joints and not to leave any film that would attract dust.

2600 x 70 x 17 mm
2600 x 100 x 17 mm

Mounting parts

Suitable for various skirting boards.

15 meter skirting boards can be easily and professionally fitted with the contents of one packet. The set is supplied complete with screws and wall plugs.

Corner pieces

Available for skirting systems K40 and K58C.

End piece | Inside corner | Outside corner

Floor profiles Floor profiles enable you to create smooth crossovers between different rooms or floorings. End profiles also ensure perfect edge finishes.

Threshold profile

For level floorings. For screw or click-in fixing. Anodised in modern colours or covered with high-quality wood decor films.

900 mm or 2700 mm

End profile

For clean finishes and joints at walls and other boundaries. For screw or click-in fixing. Anodised in modern colours or covered with high-quality wood decor films.

900 mm or 2700 mm

Ramp profile

For different level floorings. For screw or click-in fixing. Anodised in modern colours or covered with high-quality wood decor films.

900 mm or 2700 mm

Underlays Depending on the situation in the room, attention must be paid to the correct underlay material when laying the floorings.

POR 1.5

Very hard-duty high-tech acoustic mat with outstanding properties in every respect / in all areas. Material: highly mineral filled polymers. Due to the extremely low thermal resistance, practically no effect on the time taken for underfloor heating to heat up. Integrated moisture protection with $sd > 200$ m.

WOOD 5.0

This insulation panel is made from wood fibres and is especially suitable for thermal insulation. But is unsuitable for rooms with underfloor heating. Because of its high wood content, a PE foil must be laid underneath it for moisture protection.

XPS 5.0

5 mm thick panels from extruded polystyrol. Excellent insulating properties and high impact noise reduction. Levels uneven patches of up to 4 mm.
